TECHNICAL SKILLS

- HTML
- CSS
- Bootstrap
- Javascript
- jQuery
- React
- MongoDB
- mySQL
- node.js

PROFESSIONAL EXPERIENCE

gottaGO

gottaGO is like Yelp, but for public restrooms. The concept for this app is too allow users to sign up for an account, leave reviews of their public restroom experiences, and search other reviews by zip code.

Team Profile Generator

Build out a team profile webpage by creating managers, engineers, and intern profile cards! Select a role (Manager, Engineer, Intern), and enter in the required information. Users may add as many roles as needed to build a team. Once completed, exit the application and an 'index.html' file will be created in the 'dist' folder with team profile cards.

- <https://github.com/nvandenberg/TeamProfileGenerator>

Let's Plan a Day!

The concept for Let's Plan A Day App is to help users connect to random events and locations based off user's zip code, Users can refresh results until satisfied. Users can email event/restaurant details to specified recipients.
